

More control.
Less effort.

Better
results.

Fuel Management Services (FMS)

Effectively managing environmental compliance and fuel inventory doesn't mean you have to do it all by yourself.

Gilbarco Veeder-Root's Fuel Management Services are powerful, web-enabled applications that provide greater control, less effort, and

better results for environmental compliance, fuel management and equipment uptime. Limit compliance risk through 24/7/365 monitoring. Enjoy increased uptime and minimize service costs through remote diagnostics and resolution. Maximize profitability and efficiency through real time fuel data and loss analysis.

Enjoy the increased value that experienced specialists can deliver through detailed analysis, continuous oversight and state-of-the-art infrastructure that is remotely monitoring tens of thousands of sites around the world today.

Backed by powerful, cost-effective technology and human expertise, FMS offers:

- > Environmental risk and compliance management
- > Fuel logistics and planning support
- > Site equipment monitoring and uptime
- > Fuel loss analysis and fuel inventory control
- > Managed maintenance programs
- > 24/7 access to critical information through www.fmsonline.com and toll-free help desk
- > Efficient data collection and web-based reporting
- > Compatibility with existing back office or ERP systems
